Linking content items to use on multiple pages	X	X	X
Standard content elements			
Text: Headline & WYSIWYG	X	X	X
HTML	X	X	X
Gallery	X	X	X
Image & text	X	X	X
Video player	X	X	X
Link list	X	X	X

w w w . s i m p l e s s u s . c o m

News list	X	X	X
Contact form	X	X	X
Login form	X	X	X
Search form for full text search	-	X	X
Sitemap	X	X	X
Voting	-	X	X
Media & Document Management			
Document & file upload and download up to 2 GB	X	X	X
Any folder structures	X	X	X
Thumbnails for images, videos and PDF documents	X	X	X
Copy and move files with drag & drop	X	X	X
Video-preview	X	X	X
Search engine optimization			
Automatic, speaking URL structures	X	X	X
Freely definable URLs per page	X	X	X
Automatic generation of meta-information such as "alternate" and "canonical" URLs			
Meta tags can be defined globally and per page	X	X	X
Automatic underlay of "obsolete URLs"	X	X	X
Google sitemap - contains besides content pages all other optional data objects from modules like news, forum threads, shop products or events	-	-	X
Performance			
High performance website rendering thanks to an intelligent caching engine	X	X	X
Very good backend-performance after initial loading, since there will only be data exchanged via Ajax, and no other program uploads	X	X	X
Security & rights management			
Group administration for user rights	X	X	X
Access control per page	X	X	X
Registration form for new users	-	-	-
Automatic spam-bot protection for all e-mail addresses on every page	X	X	X
OpenID Login	X	X	X
Captcha-Code to secure forms	X	X	X
Cockpit / Dashboard			
Last edited pages and bookmarks for quick access	X	X	X
Change and add any portlets, various standard layouts available	X	X	X
Most recently uploaded files	X	X	X
Approval process / Revision control			
Workflow engine to configure a multi-step approval process	-	-	-
All data can be versioned, records are never physically deleted or overwritten	X	X	X
News system			
Messages can be categorized	X	X	X

Message list and single view	X	X	X
Scheduled live circuit	X	X	X
Automatic posting to Facebook and Twitter	-	-	-
Mini-shop			
Simple article management	-	-	-
Article single view with photo, description and price	-	-	-
Shopping basket	-	-	-
Orders are sent via e-mail	-	-	-
Seminar Database			
Management of seminars by category	-	-	-
Quota monitoring	-	-	-
Online booking	-	-	-
Calendar of events			
Collection of events by freely determinable categories	-	-	-
Import & Export from CMS or XML	-	-	-
Appointments / eAppointment			
Online appointment booking	-	-	-
Setting of opening times / bookable dates	-	-	-
Appointment booking triggers e-mail	-	-	-
External integration			
RSS Import	-	-	-
Social media widgets (e.g. for Facebook or twitter)	-	-	-
Google analytics tracking code	-	-	-
Add this code	-	-	-
Newsletter system			
Free design selection	-	-	-
Management of recipients in multiple hubs	-	-	-
Automatic title of the receiver	-	-	-
Web view	-	-	-
Online archive	-	-	-
Newsletter evaluation / statistics	-	-	-
Forum			
User registration and user Profiles	-	-	-
Internal news	-	-	-
Categories can be changed arbitrarily	-	-	-
Thread-moderation	-	-	-
E-mail notifications of thread subscriptions	-	-	-
Administration			
User management with lock and unlock function	X	X	X
Import of backend users (CSV)	X	X	X
Transfer of all rights to another user in the case of employee departure	X	X	X

Timezone and language selection	X	X	X
Theme selection	X	X	X
Search through all data objects	X	X	X
System protocol	X	X	X
